*There cartridges are simply amazing,
very delicate work, clear needle travel,
excellent ink flow and no vibration.
My rating , best!*

A man with long dark hair and a goatee, wearing a black hoodie, is holding a black and white cat. The cat has white eyes and white paws. In the foreground, two V-Select cartridge needles are shown. The background is dark.

*Those new needles are AWESOME!
3 and 7 liners are super accurate.
Nice and thin lines, very steady and
accurate.*

The New EZ needles (V-Select) seem very good for the work style I do. The needles that I use the most are Curved Magnum (7-15) that make a very clean and uniform gradient, and for me that is very important to do a good job.

The New cartridges V-Select for me are more dynamics to get soft shadow in black and grey tattoos are more strong and solid color in color tattoo. The shape of Round Liner and Round Shader Cartridges are just amazing. I can see perfectly the tips when i work, which is very good to work.

*I really enjoy rounded liner.
It's really precise for doing small details,
lines and textures one of the most
important techniques of my work*

*I feel than needles moves in cartridges
much more stable than before.
And also new changes in plastic tip
make better flow out of inks.*

I feel like the ink stay more inside the v-select, there is a good feeling on the skin. The cartridges have a soft cushioning with give flexibility.

V-Select is professionanlism in craft with the precision on hand. The needles are always on it's spot , so lines are super straight and shadow super smooth! Plus, the needle stays sharp during all session. It's working perfectly for BnG and Color works.

*I love the new V-Select needles!
Super precise with a softer membrane which
makes for an effortless tattoo.*
